

Task timing

High Priority

Switching frequency	Analog Acquisition (currents)	Encoder Calculation	Control Execution	Error Monitoring
---------------------	-------------------------------	---------------------	-------------------	------------------

Low Priority

10 ms	Service Watchdog			
20 ms	System Manager	Read Digital Inputs	Analog Acquisition (Low Prio)	Reference Handler
200 ms	GUI	Handle System Clock		
1 s	Restart Pushbuttons	Calculate Temperature
